A Message From our Presidents!

Dear WiS community,

As we head into March and the second semester, Women in Science is excited to continue building a supportive, inclusive, and empowering community for students across disciplines. This term, our goal is to create spaces where members can connect, recharge, and explore their interests both inside and outside the classroom.

We have a variety of events planned for the semester, including career-focused programming, wellness initiatives, and mentorship opportunities. We've already kicked things off with a successful career panel, and Yoga Night which offers a chance to unwind and prioritize well-being during a busy academic term. Our mentorship programming will also continue, designed to foster meaningful connections in a relaxed and creative setting.

In addition, we had one of our largest initiatives of the year — STEMposium. This flagship event highlighted research, innovation, and leadership within STEM, and had opportunities for members to get involved behind the scenes.

As the semester gets underway, we wish everyone the best of luck in their classes and commitments. We're excited for what's ahead and hope to see you at our events and around campus throughout the term!

Bobo, Julie, Bahar

Co-Presidents of Women in Science

Portfolio Spotlight: VP Communication

Emma Turgeon

3rd year, Pathology & IMS

Why did you join WiS?

I joined WiS to support the vibrant community of women in science that I am so passionate about! Being able to foster meaningful connections that allow us to grow together is an unmatched feeling. Anyone who knows me knows about WiS :)

What inspired you to join the communications portfolio?

Comms lets me creatively share WiS's amazing mission to as many people as possible. I love working to expand our audience so that more women can experience the positive impact of our club!

What goals do you have for your portfolio this year?

This year, we have already been able to execute multiple social media campaigns that have increased attendance and engagement at events! We also successfully executed our super cute merch drop and can't wait for everyone to rep WiS in style 😎.

Best WiS memory so far?

My favourite memory has to be STEMposium 2026. Seeing the collaboration across the club and science faculty was a great example of working together for a bigger cause. I got to connect with so many high school students who were eager to learn about science, and sharing my knowledge with them was such a motivating experience!

Portfolio Spotlight: VP Communication

Why did you join WiS?

I joined Women in Science to meet new friends and gain some mentors within my field of study! Joining WiS has made me feel a part of something bigger than myself, and I'm so grateful to contribute to the supportive community we foster, even my non-science friends join me for WiS events 😊

What inspired you to join the communications portfolio?

I think a huge component of the sciences is communication. What good is a new discovery if we don't know how to share it? I'm really passionate about bridging the gap between knowledge and understanding, and being a part of the comms team has helped me strengthen that skill!

Shaen Goodall

3rd year, Biology & Medical Sciences

What goals do you have for your portfolio this year?

Comms has done a lot of great things this year! We merged the comms and design teams to improve interdepartmental communication, we've changed up our weekly campaigns, adding "Sunday Spotlight", and most recently we've designed the super cute merch!

Best WiS memory so far?

There are so many, but one that stands out to me is the 10 year anniversary of WiS celebration! It was so inspiring to learn about where WiS started, how much the club has grown, and to get to hear from some amazing established women in the field of science. It truly was a night to appreciate the impact of WiS, and made me proud to be a part of it ❤️🩹

February RECAP

Yoga Night Recap

On February 25, we hosted a Yoga Night at the Rec Centre for an evening dedicated to unwinding, resetting, and recharging. It was a great opportunity to slow down, move our bodies especially as we eased back into classes after reading week. Participants enjoyed complimentary Ginger Shots and were entered into our giveaway for two FREE passes to Elements Hot Yoga London. Congratulations to our winners! Thank you to everyone who joined us and helped make the evening so special. We loved seeing our community come together for a relaxing night, and we look forward to hosting more events like this in the future.

New Blog

This February, WiS would like to remind our community about the launch of the WiS UWO Blog, a new addition to our website that remains open and available to explore. This space was created to highlight resources, opportunities, and stories that support women in science and technology at all stages of their academic and professional journeys. Our first blog post focuses on the various forms of support available to women in technology, from high school programs to university mentorship and beyond. By compiling these opportunities in one place, the blog aims to make navigating the tech landscape more accessible and empowering for women of all ages. We encourage you to check it out if you haven't already, and we look forward to continuing to expand the WiS Blog with future posts that inform, uplift, and connect our community.

Women in Science

STEMposium Recap

Our annual Women in Science STEMposium at Western University was an inspiring day filled with a ton of insight into the science world, and connections with our community. Students had the opportunity to engage in hands on activities, connect with women in STEM, and learn more about the diverse science pathways available at Western.

We would like to thank our incredible panel featuring Jennifer Evans, Mo Hagan, Sarah Gallagher with a keynote speaker Matt Davison, the Dean of the Faculty of Science. Each speaker shared valuable insights about their career journeys, challenges, and advice for students interested in pursuing STEM fields.

We were also excited to have several other science clubs in attendance to share their clubs initiatives and goals in science. Thank you to everyone who attended, volunteered, and contributed to making STEMposium such a success. We loved seeing so many future scientists come together for a day of learning and inspiration.

We can't wait to do it again next year!

WE WANT YOUR INPUT

Our Anonymous Feedback Form is a space for you to share your thoughts and ideas with us. At WiS, we aim to host events and initiatives that truly cater to the needs and interests of our members. We'd love to hear your suggestions on how we can improve and which events and initiatives you're most excited about.

INVITE A FRIEND

Know someone who's interested in joining WiS? Invite them to any of our events and encourage them to fill out the General Member Form linked below to get registered. Everyone is welcome!

We are committed to supporting the inclusivity and continued contributions of women in the sciences while encouraging participation from all genders, including those in stereotypically "feminine" fields, and promoting gender non-conforming individuals in all scientific endeavors.
